

# Target Shooting

## Feinwerkbau Air Rifles

### FWB Model 700 Alu

The precision design of the Model 700 system combined with the various possibilities of adjustment offer to the shooter the best results. The high-quality finish of the complete rifle and the perfect combination of aluminium and wooden components make the Model 700 Alu an exclusive air rifle.

The shooting impulse is nearly eliminated in the barrel plane due to the inner absorber. With the 4x4 vario sight mounts the sighting line can be adjusted between 40 and 60 mm (from the barrel centre). Furthermore the sight line can be shifted up to 16 mm to the right or the left in four steps from the barrel axis. The ergonomic grip (available in size S, M and L) is adjustable three-dimensionally.

The various possibilities of adjustment of the butt plate and cheek piece allow an optimum body contact between rifle and shooter. Pile weights (special accessories) can be mounted in different positions to optimize individual balance. The aluminium hand rest is adjustable in three-dimensions and permits attachment of the handstop & swivel. The shooting sling can be attached either directly to the stock or to the hand rest for three-position-shooting.

Available in blue, red and black.

### FWB 700 Universal

A compressed air rifle with the technical design features of the Model 700 series is also available in a classical design stock of laminated wood. This stock of warp free white laminated wood is available in a right- or left handed version. The ergonomically designed laminated stock allows different a range of possibilities of adjustment of the butt plate and cheek piece to adapt to the shooter.

By fixing an accessory wedge to the rail in the stock, the Model 700 Universal can be used for shooting Bench Rest.

### FWB 700 Basic

A reasonably priced option for shooters who want to combine the precision of the well-tried 700 series with versatility. The high-quality trigger with its possibilities for adjustment as on model 700 together with an ambidextrous stock of solid beech wood allows a wide range of possible applications.

It goes without saying that the Model 700 Basic is equipped with a patented inner absorber and with the Feinwerkbau precision sight. The cheek piece is adjustable in height and the butt plate is also adjustable in height. The rail mounted in the stock can be fitted with a handstop.

By fixing a wedge (special accessories) to the rail in the stock, the Model 700 Basic can be used for shooting Bench Rest.

### FWB 700 Evolution

An air rifle for multipurpose and flexible use in the shooting sports.

The high-quality system of the top-model-series 700 is placed in a slim stock made of aluminium. The notches in the front stock give this model a special appearance in addition to the technology used.

A wooden universal ambidextrous grip enables perfect handling of this model. Butt plate and cheek piece are adjustable in length and height. Furthermore the hand rest is adjustable. The Model 700 Evolution can be upgraded by using special accessories from the Feinwerkbau product range when the shooter's demands increase. The aluminium barrel sleeve turns the Model 700 Evolution into a real lightweight and the available colours give this model an attractive appearance.

As the Model 700 Evolution "Top" this model is already equipped with the 4x4-vario-sight, an adjustable hand rest, a cheek piece adjustable in height and length and pivoted and a butt plate made of aluminium.

With the Model 700 Junior an absolute classic is back in the Feinwerkbau product range.

The stock made of laminated warp-free wood is suitable both for right and left-handed shooters. The various possibilities for adjustments of the trigger, the butt plate and the cheek piece allow junior shooter's best results at the club.

Another most interesting feature of the model 700 junior: it adapts to the needs of the shooter, by addition of special accessories this model can be upgraded as the shooter grows.

### FWB 700 Junior

With the Model 700 Junior an absolute classic is back in the product range of Feinwerkbau.

The stock made of laminated warp-free wood is suitable both for right and left-handed shooters. The various possibilities for adjustments of the trigger, the butt plate and the cheek piece allow the junior shooter's best results at the club.

And the most interesting feature of the model 700 junior: it adapts to the needs of the shooter, by addition of special accessories this model can be upgraded as the shooter grows.

### FWB 500

The air rifle Model 500 combines easy handling with proven Feinwerkbau quality and precision with a favourable price.

This model is equipped with the precision Feinwerkbau rear diopter. The sighting system is completed with an 18mm front sight. The solid beech stock is of ambidextrous design and the cheek piece and butt plate can be adjusted in height. The length of the butt plate is variable via intermediate plates (special accessories).

The integrated rail in the stock allows for attachment of a shooting sling holder and/or a hand stop (special accessories) making the Model 500 a real all-rounder with a wide spectrum of use. This rifle can be fitted with various special accessories (e.g. weights, raisers etc.).

The Feinwerkbau air rifle Model 500 is an option with many possibilities of use – and not only for shooting clubs

### FWB 700 Basic Bench Rest

The Model 700 Basic for shooting on a rest is the favourable option in this discipline.

There are no compromises with regard to the technical details. This model is equipped with a special stock in ambidextrous design for shooting on a rest. The rubber butt plate is as well as the special cheek piece adjustable in height.

### FWB 700 Alu Bench Rest

Model 700 Alu Benchrest. Cheek piece, forend, extended sight line and the butt plate are especially adapted to the demands of the bench rest discipline. Dioptre sights if required can be purchased separately.

The well-tried system of the 700 series allows best results in this challenging discipline.

The anatomic grip is available in sizes S, M and L.

### FWB P70 Running Target

The model P70 Running Target is the perfect choice for all shooters in this discipline. With this air rifle best competition results have been achieved due to the outstanding design features.
